

Lists

- List is a collection of similar or different data types.

`list1 = ["soccer", "Basketball", "chess"]` → similar datatypes
`list2 = ["Azaan", TRUE, 24, "70.42"]` → different datatypes.

```
type(list) → op → <class list>
```

→ List is mutable

```
list = ["Azaan", "Tejas", 24, 70.42, True]
```

```
print(list)  
list[2] = 14  
print(list)
```

List Index:

	T	E	J	A	S	
Index=	0	1	2	3	4	→ positive indexing
	-5	-4	-3	-2	-1	→ negative indexing
