

Tuple: It is a collection of similar or different.

↳ Tuples are Immutable.

dictionary → { }

tup → ()

slicing / indexing ✓

Ordered → Azaan 24 13 TRUE false

Immutable → ✓

Heterogeneous → More than 1 data type.

Slicing:

name [startIndex : endIndex : step]

↓ include

↓ not ~~ex~~ include

↗ if

A Z A A N
0 1 2 3 4

print [name [1 : 4]]

```
tuple1 = ('a', 'b', 'c', 'd', 'e')
print(len(tuple1))
print(max(tuple1))
print(min(tuple1))
print(sorted(tuple1))
```

→ 8 10 7 → ascending or

→
